Introduction

This training manual is for the household and community leader questionnaires of the wave four data collection for the Assessment of Learning Outcomes and Social Effects of Community-Based Education in Afghanistan (ALSE): A Randomized Field Experiment. Data will be collected from September to November 2017 from 181 villages in 6 provinces: Bamiyan, Daykundi, Ghor, Herat, Kapisa, and Parwan. Thirty-five households will be interviewed for the Household Survey in each village. One interviewer will conduct each household survey. Each survey should take approximately 1 to 1.5 hours to conduct. This research is being done in partnership with two NGOs—CARE and CRS—who are establishing and supporting community-based schools in all communities. CARE is supporting schools in Parwan and Kapisa provinces; CRS is supporting schools in Bamiyan, Daykundi, Ghor, and Herat provinces. In early 2014, CARE and CRS established community based schools (CBE) in 131 villages. They also established CBE in 44 other villages in 2016. Additionally, there are 6 villages in the sample where a CBE has been established by another NGO. You will conduct the Household Survey in villages where there is already an established CBE.

ALSE/NYU facilitated the transfer of 69 CBE classes in 62 villages to local community institutions (Community Development Councils, Education Shura (School Shura)/Education Subcommittees, and School Management Shuras) in March 2017. While these three institutions are supporting the management and administration of these classes, ALSE/NYU is providing some financial support. This transfer was done in order to test whether local community managed CBE is a sustainable option for the continuation of CBE at the village level.

The village breakdown by organization:

ALSE/ NYU	CARE	CRS	Other NGO
62 Villages	50 Village	63 Villages	6 Villages

These interviews must be conducted professionally and according to the guidelines outlined in this manual. **Project Associates hired by NYU will randomly accompany teams of surveyors to villages to ensure that all are adhering to these guidelines. These visits will occur randomly so you will not know in advance when the Project Associates will come to observe your work. If it is found that you are not adhering to the guidelines set forth in this manual, you may be withdrawn from working on the survey and barred from future work on the ALSE project.**

Please make sure that villages know that you do not work for either CRS or CARE and that the answers that they give to your questions not affect the NGO's support for the school in their community.

Finally, you should try to receive truthful responses from respondents interviewed. To do this, make sure to have a good relationship with those you interview and to make sure that they trust you. They

IMPORTANT GUIDELINES

- Know and follow all guidelines in this manual
- Do not represent yourself as working for either CRS or CARE
- Make sure your behaviour reflects well on ACSOR, CRS/CARE, and NYU
- Make sure interviewees feel comfortable and know that you will not share their answers with anyone

should know that their answers will not be shared with anyone and that there are no right or wrong answers to any question.

Before you begin

Selecting respondents

The household survey should be completed with the head of household (HoH): the **primary decision-maker** for the household. If the HoH is unavailable, you should make an appointment to return to the house to interview the HoH later.

If you are in the village for just one day, you should return to the household at least once that day to try to conduct the interview. If you are in the village for more than one day, you should also return to the household at least once more on each subsequent day.

If the HoH will be unavailable for the entire time you are in the village, you should interview another adult decision-maker from the household. If multiple adults are available and willing to be interviewed, you should interview the person who is responsible for making decisions in the absence of the HoH. This person should be knowledgeable about the education status of the children in the household.

If no adult member of the household is available to be interviewed on any of the attempts to visit the household, you should replace that household following the instructions in the *Enumeration and Sampling Guidelines*.

IMPORTANT GUIDELINES

- You should interview the head of household (the primary decision maker)
- If you cannot interview the head of household, interview the person who is responsible for making decisions when the head of household is not there.

Reading and recording answers

You will complete a survey questionnaire with each head of household. The survey has different types of questions with different instructions for completing the answers. Below are the main types of questions. Each question has a different symbol associated with it throughout this guide. Every time you see that symbol, you should follow the instructions for that type of question.

Important Guidelines

- When reading the questions, you should read all response options out loud unless it specifically says **DO NOT** read responses, in which case you must not, under any circumstance, read the response options out loud.
- For each question, circle only **ONE** response, unless directed to **select all that apply** in which case you must circle all the responses the respondent mentions.

Types of Questions

	<p>SELECT RESPONSE: Circle the numeric code associated with the response option that the respondent chooses, using the picture below as an example:</p> <p style="text-align: center;">Q7- آیا رئیس فامیل میتواند تا به زبان مادری خود یک مقاله روزنامه را بخواند یا خیر؟</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <tr> <td style="text-align: center;">1</td><td style="text-align: right;">بلی</td></tr> <tr> <td style="text-align: center;">2</td><td style="text-align: right;">نخیر</td></tr> <tr> <td style="text-align: center;">98</td><td style="text-align: right;">انکار (نخوانید)</td></tr> <tr> <td style="text-align: center;">99</td><td style="text-align: right;">نمیدانم (نخوانید)</td></tr> </table> <p>*This is the most common type of question on the survey*</p>	1	بلی	2	نخیر	98	انکار (نخوانید)	99	نمیدانم (نخوانید)
1	بلی								
2	نخیر								
98	انکار (نخوانید)								
99	نمیدانم (نخوانید)								
	<p>OPEN ENDED QUESTION: Write down the respondent's answer.</p> <p>If the respondent refuses to provide an answer, then <u>you should still mark the appropriate code</u> (97, 98 or 99 – see below).</p>								
	<p>OPINION SCALE: Read <u>all</u> answer options (e.g. strongly agree / agree / disagree / strongly disagree). Make sure to capture the respondent's degree of agreement. For example, such as "I sort of disagree," ask for clarification by saying "so, would you say that you strongly agree, agree, disagree, or strongly disagree? Please pick the one that is closest to your own opinion." Do not indicate what your opinion is or whether you think that there is one answer that is better than others.</p> <p>For battery style questions that have this type of opinion scale, make sure to read all response options for each battery portion. Do not just read the scale once at the beginning of the question.</p>								
	<p>STOP AND OBSERVE: Do NOT ask this question to the respondent directly. <u>Observe</u> the answer and circle the appropriate response on the survey.</p>								
	<p>ROSTER: These questions track information for the same boys or girls. List all boys or all girls first. Then ask all questions on that page for one child before moving on the next child. This will help make sure that you do not get confused about which child you are discussing.</p>								
	<p>TO BE COMPLETED BY YOUR SUPERVISOR: There are a few questions on your survey that are to be completed by your supervisor, or by ACSOR either before or after the survey is</p>								

	conducted. You do not need to mark a response for these questions.
--	--

Common Instructions

Some questions have instructions about how they should be read. Below are the most common instructions in the survey. Do not read these instructions to the respondent.

	READ ALOUD: Read all questions aloud to respondents. In addition, you should read some passages of text word-for-word.
	<p>SKIP PATTERN: Some questions will be skipped depending on the answer to a previous question. For example,</p> <p style="text-align: center;">Q22a. Does [NAME] currently study at a community based class?</p> <ol style="list-style-type: none"> 1. Yes (Skip to Q22c) 2. No (Skip to Q22b) <p>If the respondent answers “yes” then you continue, follow the instructions and skip ahead to Q22c. If the respondent answers “no” continue with the next question in the sequence (Q22b).</p>
	FOLLOW UP ACTION IS REQUIRED: Some questions require additional action on your part. For example, you may need to verify the information provided by the respondent against existing records or previous responses.

Standard Answer choices

Some answer choices are standard throughout the survey and should be used when the respondent does not provide an answer. You should never read these answer choices out loud.

97	Use this code for questions that have not been asked—for example, if you follow a skip pattern, use this code for the questions that you skip.
98	Use this code if the respondent says that they refuse to answer the question. You should use this code rarely. If the respondent refuses to answer a question, you should encourage (but not pressure) the respondent to answer by telling him that his answers will not be shared with anyone and that his answers will have no effect on education in his community. (See also guidance note 2 on asking sensitive questions).
99	Use this code in cases when the respondent does not know the answer to a question. If the respondent is confused about a question, you can re-explain the question using different words. This code should almost never be used in relation to an opinion question.
	‘OTHER’ ANSWER CHOICE: Some questions have an answer choice that allows you to write down the respondent’s answer if it is not included in the numeric list of answer choices. If this happens, you should circle the number associated with “other” and write the respondent’s answer on the blank line.

Interviewers should never suggest to a respondent that there is any correct answer. Respondents should feel free to give the answer that they think is most appropriate. If a project monitor finds that an enumerator is suggesting a correct answer to a respondent or pressuring a respondent to answer a certain way, she or he may not be paid for his or her work, and may be removed from working on this project.

GUIDANCE NOTE 1: CONSISTENCY AND OBJECTIVITY

It may be tempting to give respondents your opinion on a topic as you ask questions or try to guess what the respondent would say. However, this reduces the quality of the data collected, since the respondents may want to say they agree with you even if they do not. Even if you explain a question, it is important that you do not provide your opinion.

To get the best quality data, you should:

- Read the questions exactly as worded
- Provide all answer choices every time you ask a question, unless other instructions are given
- If the respondent does not understand a question, reword or rephrase according the guidelines provided in this manual.
- **Never provide your own opinion.** If the respondent is uncertain about a question, ask him or her to estimate his opinion and/or remind him that there is no correct answer.
- Record respondent's answers precisely, even if you do not agree with them.

Informed consent

Informed consent is a very important part of any research. It is an agreement established between you—the surveyor—and the respondents, and it must be respected at all times. Informed consent requires that you discuss the purpose and goals of the research with the respondents and that the respondents **voluntarily** agree to participate in the research. Informed consent is taken at the beginning of the interview, when you read the consent script) and ask the respondent to participate (Part 3 of Survey Management). Informed consent also means that at any point during the interview, a respondent may decide to end the interview.

If this happens, you should reiterate that no information the respondent gives will be traceable back to her or him. You can also indicate approximately how much time the remaining portion of the interview will take. If the respondent still refuses to continue the interview, you should thank her or him for their time, and leave the home. This guide and the survey include all the information you need to ensure that informed consent is respected (see also Part 2 of Survey Management: Greetings and Introductions and Part 3 of Survey Management Consent, below).

GUIDANCE NOTE 2: ASKING QUESTIONS ABOUT SENSITIVE TOPICS

Certain parts of this survey ask people about their cultural and social context. These questions may touch upon sensitive topics, particularly in the context of insecurity and conflict in Afghanistan. A question that is sensitive may generate an emotional response from respondents. This may occur even in cases where you yourself do not believe a question to be of a sensitive nature since reactions can depend on the personal biographies of respondents and thus cannot be predicted. Emotional responses may include: anger, upset, discomfort, anxiety, or stress. A respondent may have an emotional response to the question even if they do not show that response verbally or physically. These responses may occur for different reasons, including the fact that they feel judged, misrepresented, or endangered. For your safety as well, as the safety of the respondent, it is important to be aware of these possibilities and to be able to respond appropriately.

The following advice can minimise problems:

When asking questions

- **Ask questions exactly as worded.** All questions have been designed to avoid emotional responses as much as possible. If you need to re-explain a question using different wording then you should do so in a way that avoids bias or presenting your opinion.
- **At all times, respect a respondent's decision not to answer a question.** You can encourage a respondent to answer but never pressure a respondent to answer a question or give the impression that you are unhappy with their response. Pushing someone to answer questions they do not understand or forcing them to answer in cases where they claim not to have an answer or opinion can generate frustration and undermines the trust between yourself and the respondent.

When observing responses

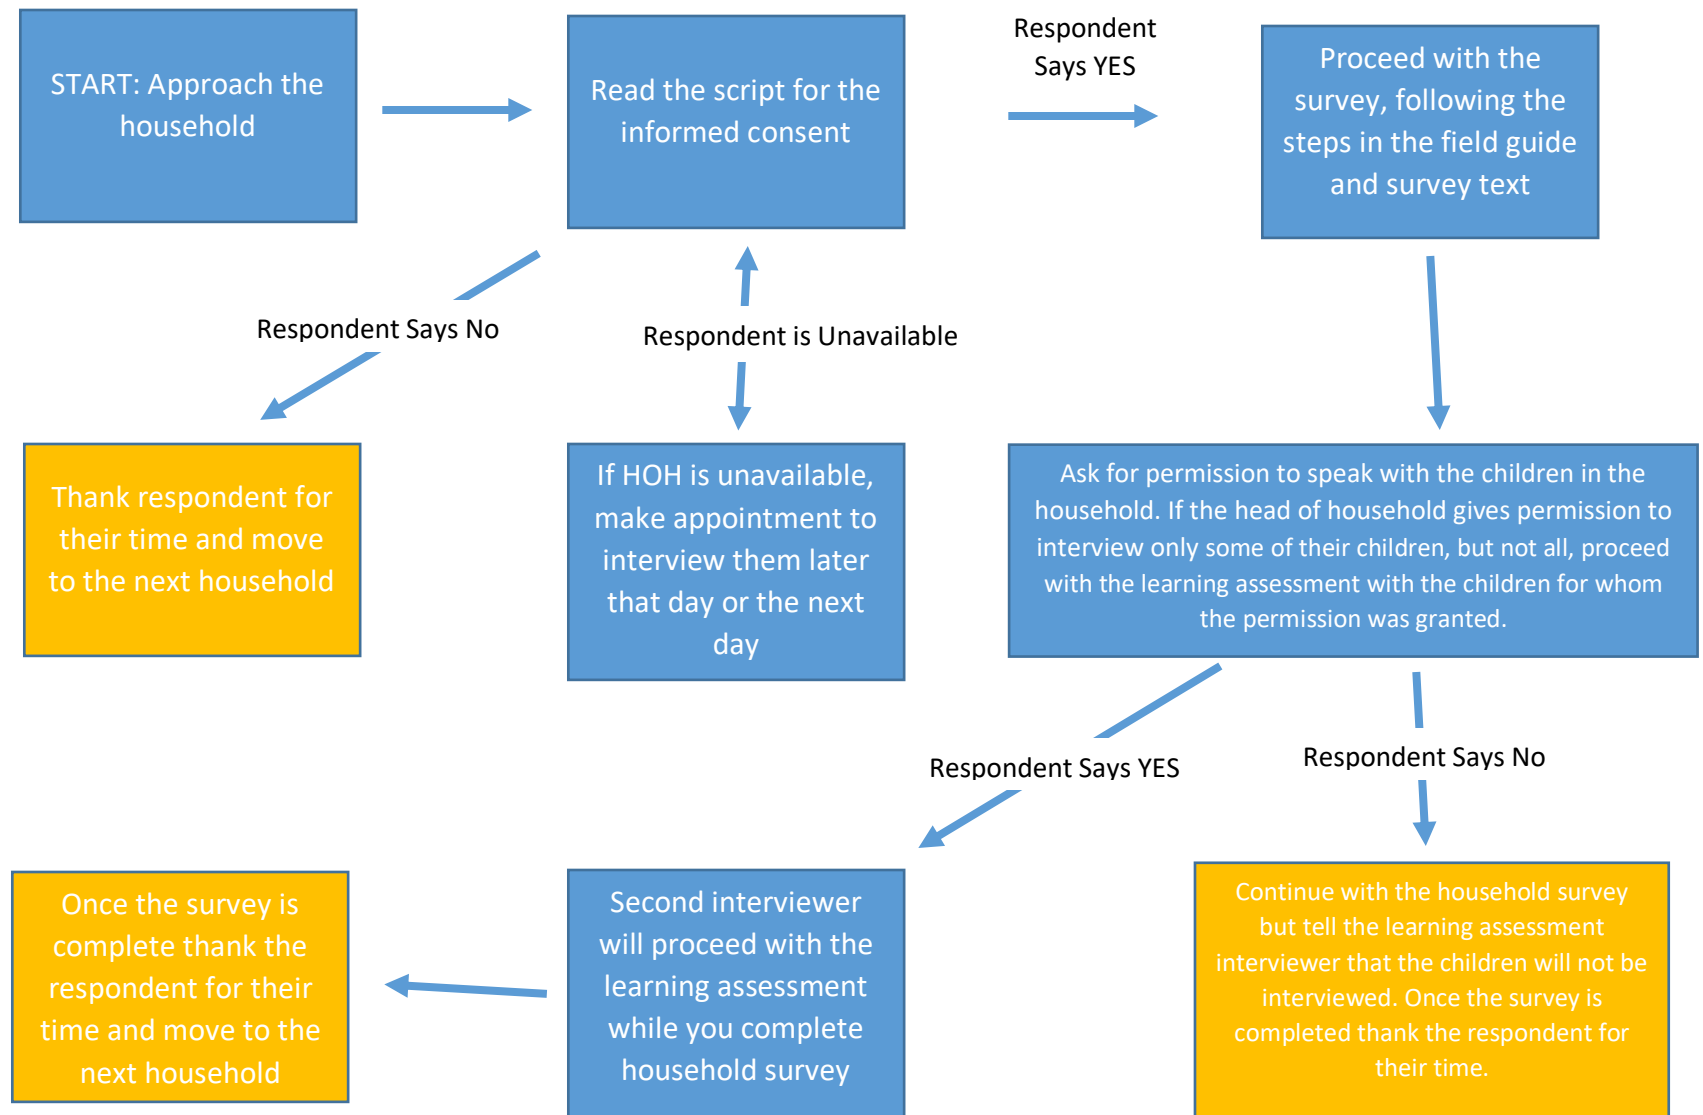

- **Pay attention to how respondents react to questions.** This includes not only verbal frustration but also their body language. If a respondent verbally or physically shows discomfort you should:

- Pause and reassure them about the purpose of the question
 - Tell them that their answers will not be shared with anyone else
 - Tell them that they do not have to respond if they are uncomfortable doing so.
- **Be careful how you react to the responses provided.** Your behaviour may convey shock or surprise that could offend or upset the respondent. This includes visibly expressing your disagreement (eye rolls, frowning and other expressions of surprise).

Important instructions

The survey includes twelve sections in total. Each section collects information on a different topic. The following sections in this manual provide an overview of each section. This is followed by more detailed information and instructions about each question. In each section, space is provided for you to take notes during the training.

Part 1: Survey Data

SECTION 1 AT A GLANCE...

This section of the survey includes 26 questions (H.1, E.1 and M.1 to M.23). It collects management information on the sample, community, and household family being interviewed.

There is one multi-part question (Question 11).

- ⊗ All of the questions in this section should be answered by observation only! Questions E.1 and M.2 to M.13 should be completed BEFORE you approach the household.**

Part 2: Greetings and introductions

PART 2 AT A GLANCE...

This section sets the tone for the rest of the interview and for gaining informed consent. You should approach the selected dwelling and ask to speak with the head of household (HoH). If the HoH is not there, you should ask to speak with another adult who is knowledgeable about the household and decision-making. If there are multiple appropriate adults available and willing to be interviewed, please ask to speak with whichever individual is responsible for making decisions for the household when the HoH is not there.

If no one answers the door or if no one is available at this household, indicate this on the contact sheet attached to your questionnaire and mark the reason that you were not able to do the interview. Then, proceed to the replacement household following the sampling plan.

IMPORTANT NOTE: Once the head of the household or another adult who is knowledgeable about the household is identified, you should introduce yourself by reciting a consent script included in the survey and provided below.

You must read the script provided in Part 2 (Greetings and Introductions) word for word. Make sure that the village has a CBE school.

Notes to interviewer: Do not read instructions inside parentheses “(...)” or brackets “[...]”. Read all questions aloud word for word. **Read all answer choices aloud unless you are instructed not to do so.**

Part 3: Consent

SECTION 3 AT A GLANCE...

This section of the survey relates to the script you need to read in order to obtain informed consent. The script itself is included in the survey and provided below.

You should read the script provided word for word. Note that you are required to ask for two types of consent from the respondent.

- 1. Is the respondent/HoH willing to participate in the survey?**
- 2. Will the respondent allow the team to talk to children in the household? Will the respondent allow the team to talk to all of their 6 – 13 years old children?**

NOTES	INSTRUCTIONS	CONSENT
<i>After approaching the household and introducing yourself (see Part 2) you need to ask the respondent for their informed consent. There are two levels of informed consent to ask for. The first is for the head of household. The second is for informed consent to speak with the children of the household.</i>

Section I: Head of Household Information

SECTION 4 AT A GLANCE...

This section includes ten questions (from Q1 to Q10). Question 8, 9, and 10 are multipart questions.

 This section includes skip patterns.

 You should begin this section by reading the following script:

“I would first like to ask you a few questions about yourself and your household.”

REMEMBER!

- 97:** Use this code for questions that have not been asked. Use this code for questions that were skipped.
- 98:** Use this code if the respondent voluntarily refuses to answer the question.
- 99:** Use this code if the respondent does not know the answer to this question (only use once the question has been re-explained to the respondent using more detail or different words).

Section II: Collection of Information for Child Learning Assessment Participants

SECTION 2 AT A GLANCE...

You are required to collect the names and ages of all children between the ages 6 and 13 in the household. This is to allow the Child Learning Assessments interviewer to conduct the assessment with these children while you proceed with the rest of the survey.

This section includes 4 questions (from Q11 to Q14). Q12 and Q14 appear in roster format. This means that you should follow these steps in order:

1. Write the names of all boys or all girls in order, from oldest to youngest
2. Ask all questions on that page about each child before moving on to the next child.

Q11 is repeated for girls in Q13 and Q12 is repeated for girls in Q14.

Questions 12 and 14 are multipart questions.

You should begin this section by reading the following script:

Read: I would like to ask you about the education of the children who live in this household. I am first going to ask about the boys and then I will ask about the girls. Let's start with the boys.

Once you have completed this section, the Learning Assessment Interviewer can start the Learning Assessments with eligible children. The Household interviewer will continue with the Household Survey.

REMEMBER!

97: Use this code for questions that have not been asked.

98: Use this code if the respondent voluntarily refuses to answer the question.

99: Use this code if the respondent does not know the answer to this question (only use once the question has been re-explained to the respondent using more detail or different words).

Section IV: Education of Boys

SECTION 4 AT A GLANCE

This section includes 3 questions (from Q21 to Q23). All questions have multiple parts.

✕ This section includes skip patterns.

All questions in this section are in roster format. This means that you should follow these steps in order:

1. Write the names of all boys in order, from oldest to youngest
2. Ask all questions on that page about each child before moving on to the next child.

IMPORTANT NOTE:

The roster number of each child **MUST** be the same as in Q12 and **MUST** remain the same throughout the survey.

In order to avoid confusion and to be sure that you ask all components of a question as indicated in the survey you are strongly advised to familiarize yourself with these questions in advance of administering the survey.

Where words appear in *[brackets]*, select the appropriate word for the child you are asking the questions about. For example, where it says [NAME], you should read the name of the child.

REMEMBER!

- READ ALL RESPONSE OPTIONS IN THIS SECTION!
- ALL RESPONSE OPTIONS OF Q23A – Q23F SHOULD BE ASKED AS ‘YES’ OR ‘NO’ QUESTIONS!
- CIRCLE ALL RESPONSES THAT APPLY FOR Q23A, Q23C, AND Q23E.

Section XII: Demographics

SECTION 12 AT A GLANCE...

This section collects additional important demographic information.

This section includes 6 questions (from D1 to D6).

After asking question D6 you should read the Closing Statement A out loud for villages with CBE classes and read Closing Statement B out loud for villages without CBE classes :

Statement A (Villages with CBE classes): “Thank you again for participating in this survey. We are extremely grateful for your time. Do you have any questions about this survey? As a reminder, we **work for ACSOR-Surveys**, a survey company hired by independent researchers conducting a study on education in your village. We are not employed by any of the organizations that are managing the community-based class in your village. But we are studying community based classes with their permission. Your answers will not impact the community based class in your village. Thank you again for your time.

Statement B (Villages WITHOUT CBE classes): “Thank you again for participating in this survey. We are extremely grateful for your time. Do you have any questions about this survey? As a reminder, we **work for ACSOR-Surveys**, a survey company hired by independent researchers conducting a study on education in your village. Your answers will not impact education in your village. Thank you again for your time.

REMEMBER!

- 97:** Use this code for questions that have not been asked.
- 98:** Use this code if the respondent voluntarily refuses to answer the question.
- 99:** Use this code if the respondent does not know the answer to this question (only use once the question has been re-explained to the respondent using more detail or different words).

Annex 2: Education Shura Definitions

ACSOR surveyors should review these definitions before entering into the field. The Teacher, Community Leader, and Household surveys use this terminology in questions throughout the surveys. If respondents do not recognize the shura terms used in the questions, the surveyor can describe the shuras using the definitions below. Additionally, the surveyor should be mindful and aware if the interviewees do not refer to these terms correctly in their responses. If this occurs, the surveyor should stop the interviewee and explain the definitions.

1. Community Development Councils (CDCs)
CDC shuras were established during the National Solidarity Program (NSP), which began in 2003 and ended in 2016. CDCs members were elected at the village level and were tasked with carrying out local development projects. Although NSP ended most CDC continue to exist and will continue to operate under the Citizen Charter National Priority Program.
2. Education Shura/ Education Subcommittee (ES) (sometimes referred to as School Shuras or School Management Councils)
These education shuras were often established by the CBE implementing NGO to support the CBE class at the local level.
3. School Management Shuras (SMS)
SMS refers to the shuras that were established at the hub school level and its members consist of parents, teachers, and school administrators of the hub school. They often function at the hub school level and are managed by the Ministry of Education's Directorate of Social Mobilization and Shuras (DSMS).

Annex 3: School Term Definitions

ACSOR surveyors should review these definitions before entering into the field. The Teacher, Community Leader, and Household surveys use these terms in questions throughout the surveys. If needed, the surveyor can read these definitions to the interviewees if they do not recognize the terms. Additionally, the surveyor should be mindful and aware if the interviewees do not refer to these terms correctly in their responses. If this occurs, the surveyor should stop the interviewee and explain the definitions.

1. Community- Based Education (CBE) Classes
This is typically a single class taught by one teacher and is located in a home or mosque. It teaches the government curriculum, but is typically started by an NGO. It may be supported by an NGO, local community shuras, or the Ministry of Education. Generally it only contains one grade level and does not have multiple grades. The students are also registered with the nearest government school.
2. Government School
A school that is located in a centralized building and is often attended by children from multiple villages. Classes are taught by government-supported teachers and are managed by the government. These schools have multiple grades. A government school is also referred to as a hub school.
3. Formal School (Maktab)
When this term is used it refers to both Community Based-Education and government schools. Both of these forms of education are recognized by the Ministry of Education.
